## in All Positions

### WHEAT AND FEED GRAIN STOCKS LOWER

Wheat stocks on October 1 were 5 percent less than a year earlier and 21 percent below average. Stocks of the four feed grains totaled 73 million tons--13 percent smaller than last year and 19 percent less than average, according to the Crop Reporting Board. In spite of a decline in all wheat stocks, durum holdings were 16 percent more than last year. Oats were the only feed grain with larger stocks than last year, but smaller holdings of corn, sorghum, and barley resulted in a drop in total feed grain stocks. Rye stocks were the largest since October 1, 1960 and flax-seed holdings were one-third more than average. Stocks of soybeans are not included in this report since estimates of soybean carryover were changed to a September 1 basis and released on September 23, 1965.

All wheat in storage on October 1 totaled 1,715 million bushels, 5 percent less than a year earlier and 27 percent below the record October 1, 1960 stocks. The decline in stocks occurred in off-farm holdings which totaled 1,146 million bushels, the smallest in 12 years. Farm stocks at 569 million bushels were the largest since 1958. Disappearance from all storage positions during the July-September quarter was indicated at 457 million bushels. About 47 percent of the total stocks were either owned by the Government or under Government loan compared to 53 percent a year earlier.

Durum wheat stocks on October 1 totaled 119 million bushels, 16 percent more than a year earlier. Farm stocks totaled 71 million bushels and off-farm holdings were 48 million bushels. Disappearance during the July-September quarter was indicated at 14 million bushels.

Rye stocks of 35.4 million bushels in all storage positions were the largest October 1 holdings since 1960. Farm stocks totaled 17.9 million bushels, 2 percent less than a year earlier while off-farm holdings of 17.5 million bushels were 52 percent larger than on October 1 a year ago. Disappearance during the July-September quarter was 10.3 million bushels compared with 9.0 million bushels during the same period last year. About 26 percent of the total stocks were either Government owned or under Government loan compared to about 10 percent a year earlier.

Crop Reporting Board

Washington, D. C.

Old corn carryover stocks on October 1 totaled 1,160 million bushels--24 percent less than a year earlier, 30 percent less than average, and the smallest October 1 stocks since 1955. Indicated disappearance of 755 million bushels during the July-September quarter is 12 percent smaller than for the same months in 1964, but only 2 percent less than in 1963.

Stocks of old corn on farms, of 594 million bushels, were 12 percent less than last year, but 22 percent more than average. Corn under Government loan accounted for 66 percent of the October 1 farm stocks, compared with 71 percent a year earlier. Corn held in off-farm positions totaled 566 million bushels, 14 percent less than last year and the smallest total since 1954. Over 95 percent of the off-farm stocks were owned by CCC, about the same percentage as a year earlier.

Oat stocks in all positions on October 1 totaled 974 million bushels, 12 percent more than a year earlier but 2 percent below average. Both farm and off-farm holdings were above last year, reflecting this year's sharp increase in production. About 11 percent of all stocks are CCC owned or under Government loan. Disappearance for the July-September quarter, at 303 million bushels, was the smallest of record for this period.

Barley stored in all positions on October 1 totaled 399 million bushels. This is 3 percent less than a year earlier and 11 percent below average. Holdings were below October 1, 1964 in both off-farm and farm positions. About 9 percent of total stocks were either owned by CCC or under Government loan. Disappearance during the July-September quarter, at 110 million bushels, was down 13 percent from a year earlier and 11 percent below average for the period.

Sorghum grain carryover stocks in all positions on October 1 were 566 million bushels, 13 percent smaller than on that date last year and 9 percent less than average. Over 90 percent of the holdings were located in off-farm positions and virtually all stocks were either owned by CCC or under Government loan. Disappearance of sorghum grain from all storage positions during the July-September quarter was at a record high of 92 million bushels. This compares with 66 million for this period last year.

Flaxseed stocks in all storage positions on October 1 totaled 34.5 million bushels--11 percent above a year earlier and 34 percent greater than the 1959-63 average. Of the total stocks, 19.8 million bushels were stored on farms and 14.6 million bushels were in off-farm positions. Current stocks indicate a disappearance during the July-September quarter of 10.9 million bushels from a supply of 45.4 million (carryover of 10.9 million bushels plus production of 34.5 million bushels). Crushings during the quarter are estimated at 4.7 million bushels and 1.5 million bushels are estimated for export.
